

A Good Inquiry Question should...

- Come from a place of genuine curiosity or confusion
- Be complex and not simplistic in its answer(s)
- Require a detailed analysis or investigation
- Have a clear, concise focus that naturally branches into further sub-questions
- Be accessible to all learners and learning styles
- Invite students to think deeply and in a way they may not have before
- Require support, justification, investigation, and critical thinking
- Have long-term value and be re-visited often
- Provide opportunities for students to develop soft skills
- Generate discussion and multiple perspectives
